News from the Stars:

OR, AN

EPHEMERIS

For the YEAR 1700.

WITH

Observations upon the *Eclipses*, *Solar Ingresses* and *Configurations* of Heaven happening therein.

Being the Bissextile, *or* Leap-Year, *according to the Julian, or Old Account.*

And from the *Creation* of the WORLD, according to the best of *History*, 5649 years.

WHEREIN

You have an *Account* of many things about the *Heavenly Bodies*, and their *Portents* in the same YEAR.

By WILLIAM ANDREWS, Student in *Astrology*.

By the word of the Lord were the Heavens made, and all the host of them, by the breath of his mouth. Psal. 33. 6.

LONDON,

Printed by M. and J. Wilde, for the Company of STATIONERS, 1700.

To the Reader.

WE are now come to the Great and Famous Year 1700. and Novum Sæculum, a New Age, or Century; concerning which, various Conjectures have been made, by some very Learned Men; which you have some Account of, in the ensuing Observations on this Year. However, I shall not much concern my self with their Conceptions and Expectations; Tho' some have thought, that this New Age, or Century will be ushered in with some Remarkable Prodigies, and Things of very Great and Extraordinary Portent unto the World.

'Twas the Opinion of the old Etrusci, that every Age was limited by the Gods, by a certain Number of Years; which Number of years compounded, then Prodigies Given by the Gods (sworn from Heaven, as some of the Poets) whereby it might be signified, that a New Age was begun, and that Men were born, who would make use of New Fashions and Customs, and would be more or less dear to the Immortal Gods. These Signs the Etrusci had exactly noted in their Libri Rituales, as Plutarch tells us, and Censorinus Cap. 17. de die Natali; and is cited from them, by the Learned Valesius, in his Notes upon the First Chapter of Eusebius's Third Book of the Life of Constantine.

How the Heavenly Bodies are concerned in this Year 1700. and what their Effects and Portents may be, is declared unto you herein.

WILLIAM ANDREWS.

A perpetual TABLE of break of Day, Twilight, Length of the days & nights & the Increase and Decrease of the days.

This TABLE shews you the Days when the Day breaks, and when the Twilight ends, after the going down of the Sun; and the length of the Day and Night, and how much the days are increased or decreased on the 11th. and 21st. of every Month, throughout the year, for ever; in the Degrees of

Notæ Vulgares.

Or, Common Notes for this present Year, 1700. according to both Accounts, viz.

Julian		Gregorian.
10	The Golden Number.	10
1	Cycle of the Sun.	1
F.	Dominical Letter.	E
8	Roma Indictio.	8
20	Epact.	9
30	Number of Direction.	

The Use of the Two ensuing Tyde-Tables.

TO find the time of Full Sea, or High Water at any of those Places mentioned in the two ensuing Tyde-Tables, you must observe, First, the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moon's Age every day throughout this year, 1700. and the time wherein found out the Moon's Age, according to those Directions mentioned for that purpose in the side of the said Table; then have recourse unto the said Tyde-Tables, & look for the place desir'd in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of the Moon's Age; and in the Common Angle or meeting of those Lines in the Column under your Place, you shall have the time of High-water and Full Tyde in hours and minutes.

Yet Note, That the Tydes do not always fall out exactly at the time found in these Tables, by reason of the Difference of the Moon's Latitude, High-Winds, Land-Floods, &c. which do very often alter the Times; but this is the Common Rule, generally given, for the finding of them.

A

A TABLE of the Moon's Age every day throughout this Year, 1700. whereby, with the help of the ensuing Tyde-Tables, the time of High-water and Full Tyde may be found in those Places mentioned.

Day	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.

February. Planetary Transactions and Observations, 1700.

The { 3 day at 4 in the afternoon *Jupiter* / 6 day at 4 in the afternoon *Mercury* / 9 day at 7 in the morning *Saturn* / 21 day at 4 in the morning *Venus* / 28 day at 4 in the morning *Mars* } is with the ☽.

Saturn is *Occidental*, and an *Evening-Star*, to the 12th. day of this Month; and then *He* becomes *Oriental*, and a *Morning-Star*. *Venus* is an *Evening-Star* all this Month; and *Jupiter*, *Mars*, and *Mercury*, are *Oriental*, and *Morning-Stars*.

A *Type* of the *Moon*'s *Eclipse* in this *Month*.

ON the 23th. day of this *Month*, in the *morning*, there will be a very *Great* and *Total Eclipse* of the *Moon*, in the 15th. Degree of *Virgo*, which may be seen in our *Horizon* (if the Air favour us) yet, the *beginning* of the *Moon*'s *Total Darkness*, will be much about such time with us) as the *Sun* riseth; and the *middle* and *end* of the *Eclipse* will happen to be a pretty while after the *Sun*'s up. The *middle* of the *Eclipse*, or *greatest Obscuration* of the *Moon*, being about a *quarter* of an *hour* after 7, the *end* of *Total Darkness* about 8, and the *end* of the *Eclipse* about 9 of the *clock* in the *morning*. The *total Duration* will be about 3 *hours* and an *half*; and the *Digits Eclipsed* will be above 20. —— This *Eclipse* will have some considerable *Effects*, which may be manifested in some succeeding *Months*, in some places under *Virgo* and *Pisces*. The *Sun* and *Saturn* are now in *Conjunction* in *Pisces*; and have a *Sextile* of *Jupiter* and *Venus* in *Capricorn* and *Pisces*; a *Quartile* of *Mars* and *Mercury* in *Sagittary* and *Aquarius*; and at the *Month*'s end *Mercury* is with *Saturn* in *Pisces*. Many Matters of Consequence now on foot in divers places.

Some *stormy*, *cold*, and *wet weather* in this *Month*, yet pretty *seasonable*. ——

March

{ 3 day at 10 at night, *Saturn*
5 day at 5 morning, *Mercury*
8 day at 9 at night, *Venus*
19 day at 1 morning, *Mars*
25 day at 7 at night, *Jupiter*
29 day at 10 before noon, *Saturn* } is with the Moon.

Mars and *Venus* are *Occidental*, and *Evening Stars* all this month; and *Saturn*, *Jupiter*, and *Mercury*, are *Oriental*, and *Morning Stars*.

THis month begins with a *Conjunction* of the *Sun* and *Mercury* in *Taurus*; which is followed with four *Nine Aspects*, *viz.* of the *Sun* and *Jupiter*, in *Gemini* and *Aquarius* (*Jupiter* now becoming *Retrograde* in *Aquarius*) of *Saturn* and *Mars*, in *Scorpio* and *Pisces*; of *Mars* and *Venus*, in *Cancer* and *Scorpio*; and of *Saturn* and *Venus*, in *Cancer* and *Pisces*. There is also towards the latter end of this *month* a *Quartile Aspect* of the *Sun* and *Saturn*, in *Gemini* and *Pisces*, and an *Opposition* of *Jupiter* and *Venus*, in *Leo* and *Aquarius*. The *Celestial Bodies* are now indifferently disposed, and its probable, that the General Concerns of this World in this Month, may be moderately managed, whatever may be feared to the Contrary: Tho' some things tending to Martial undertakings in some places do seem to be discoursed of, and some people in *Europe* may be busied about Fleets and Ships at Sea, &c. yet the *Effects* of the *Stars* now seem to appear pretty moderate and calm, and may not prove of any great Inconvenient Importance at this time.

There will be pretty *good weather* in this *month*: Some *cold storms* of *Hail* and *Rain* may sometimes appear *therein* in some *Places*, with some *Claps* of *Thunder* also, &c.

New Moon, the 6 day, 29 minutes past 2 morning.
First Quarter, the 12 day, 37 minutes past 4 afternoon.
Full Moon, the 20 day, at 28 minutes past 6 morning.
Last Quarter, the 28 day, 13 minutes past 9 morning.

4 day at 8 morning, *Mercury*
9 day at 8 morning, *Venus*
13 day at 2 afternoon, *Mars*,
21 day at 10 at night, *Jupiter*
25 day at 5 afternoon, *Saturn*
} is with the Moon.

Saturn, *Jupiter*, and *Mercury*, are *Oriental*, and *Morning Stars* all this month: and *Mars* and *Venus*, are *Occidental*, and *Evening Stars*.

Saturn now becomes *Retrograde* in the 13th *degree* of *Pisces*; and *Jupiter*, by a *Retrograde Motion*, comes back from *Aquarius* into *Capricorn*. Both these *Superior Planets* are now *Retrograde*: But *Mars* now becomes *direct in Motion* in the 8th *degree* of *Scorpio*. The *Sun* now comes into *Cancer*, and the *Summer Quarter* doth *Astronomically* begin. This His *Ingress* is attended with a *Quartile Aspect* of *Saturn* and *Mercury*, in *Gemini* and *Pisces*; and at the *beginning* of this *month*, there's the like *Aspect* of *Mars* and *Venus*, in *Leo* and *Aquarius*. Five *Trine Aspects* of the *Planets* do also now appear; *viz.* of *Jupiter* and *Mercury*, in *Taurus* and *Aquarius*; of the *Sun* and *Mars*, and of *Mars* and *Mercury*, in *Cancer* and *Scorpio*; and of the *Sun* and *Saturn*, and *Saturn* and *Mercury*, in *Cancer* and *Pisces*; and a *Sextile Aspect* of *Venus* and *Mercury*, in *Gemini* and *Leo*: Also just at the *months end*, there will be a *Conjunction* of the *Sun* and *Mercury* in *Cancer*. In this month of *June*, the Stars are moderately *Configurated*, and by their friendly *Aspects* now, they seem to portend Things quiet and serene; and the publick Transactions of this month may be pretty peaceably carried on in many Parts of the World, notwithstanding some Rumors, and Reports, &c.—

Seasonable weather in this *month*: tho' *some hasty Showrs*, &c. may happen in *some Places*.—

New Moon, the 5 day, 45 minutes past 9 morning.
First Quarter, the 11 day, 16 minutes after midnight.
Full Moon, the 19 day, 5 minutes past 11 at night.
Last Quarter, the 27 day, 3 minutes past 12 at night.

28	♍	9 after Trinity.	15	41	22	1	☿ ☌ ♂.
29	♍	Great storms about	16	39	5♈	29	☌ ♄ ☍ ♀.
30	♎	this time, with Claps	17	36	19	24	Sun rises 4. 30.
31	♎	of Thunder, &c.—	18	34	3♉	46	Sun sets 7. 28.

2 day at 8 at night, *Mercury*,
3 day at 8 morning, *Venus*,
5 day at 9 morning, *Mars*,
18 day at 9 at night, *Jupiter*,
22 day at 10 at night, *Saturn*,
} is with the Moon:

Mars, *Venus*, and *Mercury*, are *Occidental* and *Evening Stars* all this month; and *Jupiter* is *Oriental*, and a *Morning Star* to the 8th day, and then he becomes *Occidental*, and an *Evening Star*. *Saturn* continues still *Oriental*, and a *Morning Star*.

NOw the *Face* of *Heaven* seems somewhat changed from the Appearance it had in the two *months* last past; and the Concerns of the *Stars* amongst themselves differ now from what they were in *May* and *June* past; some of them being now busied in *Aspects* of a thwarting Nature, which may have some unkind *Effects*, in sundry parts of the World, under the *Signs* wherein they happen: for there's now in this *month* an *Opposition* of *Jupiter* and *Mercury*, and of the *Sun* and *Mercury*, in *Cancer* and *Capricorn*; of *Saturn* and *Venus*, and *Saturn* and *Mercury*, in *Virgo* and *Pisces*: A *Quartile Aspect* of *Mars* and *Mercury*, in *Leo* and *Scorpio*. Besides these, there is a *Trine Aspect* of *Saturn* and *Mars*, in *Scorpio* and *Pisces*; and a *Sextile* of *Jupiter* and *Mars*, in *Scorpio* and *Capricorn*; but these two last *Aspects* are of a mild Nature. Some Nations may be much concerned in Sea Affairs at this time, and some *Martial* Transactions may appear in some Places both at *Sea* and *Land*; and some *material* Proceedings—

Various weather in this *month*. Very *great showers* of Hail and *Rain* therein, with *Thunder*, &c. in *divers Places*.

☽ New Moon, the 3 day, 10 minutes past 5 at night.
First Quarter, the 10 day, 13 minutes past 11 before noon.
Full Moon, the 18 day, 45 minutes past noon.
Last Quarter, the 26 day, 5 minutes past 10 before noon.

1 day at 7 morning, *Venus* } in
5 day at 3 afternoon, *Mercury* } ☌
10 day at 5 at night, *Mars* } with the Moon
14 day at 10 at night, *Jupiter*
18 day at midnight, *Saturn*
23 day about 11 at night, *Venus*

Jupiter, *Mars*, and *Mercury*, are *Occidental*, and *Evening Stars* all this month: And *Venus* is an *Evening Star*, and *Occidental* to the 21st day; and then *She* becomes *Oriental*, and a *Morning Star*: and *Saturn* is *Oriental*, and a *Morning Star* to the 23d day; and then *He* becomes *Occidental*, and an *Evening Star*.

MARS now puts an end to *His* long abode in *Scorpio*, and removes from thence into *Sagittary*: and on the 18th day of this *month*, about our one of the *Clock* in the *Afternoon*, the *Moon* will be very considerably *Eclipsed*, in the 6th degree of *Pisces*; but *invisible* as to *us*: I therefore pass it by. This *month* begins with a *Conjunction* of *Venus* and *Mercury* in *Virgo*, (*Venus* being now *Retrograde*) and a *Trine* of *Jupiter* and *Mercury*, in *Virgo* and *Capricorn*: Also, in this *month*, *Venus* is in *Conjunction* with the *Sun* in *Virgo*: Besides, there happens now to be an *Opposition* of *Saturn* and *Venus*, and of the *Sun* and *Saturn*, in *Virgo* and *Pisces*; a *Quartile* of the *Sun* and *Mars*, and of *Venus* and *Mars*, in *Virgo* and *Sagittary*, and of *Saturn* and *Mars*, in *Sagittary* and *Pisces*: All which seem to have important Significations, as unto some *Mundane* Concerns; and some *European* People may, in one kind or other be now, or ere long, sensible of their Portents—Where Armies and Navies are, it's probable they may be very active, and busie now: and in some Places some Inconveniences may now appear—

Great and violent Showers of *Hail* and *Rain*, with *Thunder*, &c. in this month in *divers Places*; and *unsettled weather*.

New Moon, the 2 day, about 1 morning.
First Quarter, the 9 day, 26 minutes past 1 morning.
Full Moon, the 17 day, 51 minutes past 4 morning.
Last Quarter, the 24 day, 23 minutes past 4 afternoon.

{ 2 day at 1 afternoon, *Mercury*
3 day at 9 morning, *Mars*
11 day at 2 morning, *Jupiter*
15 day at 2 morning *Saturn*
28 day at 11 beforenoon, *Venus*
30 day at 8 morning, *Mercury* } } with the Sun

Venus is a *Morning Star*, and *Oriental* all this month: *Saturn*, *Jupiter*, and *Mars*, are *Occidental* and *Evening Stars*: *Mercury* is *Occidental*, and an *Evening Star* to the 8th day, and then *He* becomes *Oriental* and a *Morning Star*.

AT the *beginning* of this *month*, *Jupiter* is *stationary*; after which, *He* becomes *direct* in *motion* in the 21st degree of *Capricorn*; and *Venus* and *Mercury*, about the *middle* of the *month*, are likewise *stationary*, and become *direct* in *motion* also; and towards the *month's end*, *Mars* passes out of *Sagittary* into *Capricorn*. The *Effects* of the last month's *Celestial Configurations*, may be now manifested in some parts of the World; and if they be of a peaceable, healthful, and propitious Temper, 'twill be well. However, now the Planets are well disposed, and are under no malevolent Aspects at this time. *Jupiter* and the *Sun*, and *Jupiter* and *Mercury*, are in a *Trine Aspect* in *Virgo* and *Capricorn*. *Mercury* is with the *Sun* in *Virgo*; and there is now a *Quartile Aspect* of *Mars* and *Mercury*, in *Virgo* and *Sagittary*. Some Nations in *Europe* may be now imployed in some Military Affairs, and under some difficulties caused by some Martial Undertakings, or by some *Epidemical* Distempers, *&c.*—

In this *month*, the *weather* will be *moderate* and *seasonable*; some *high winds* will be *therein*, especially about the *first week* thereof.

October

New Moon, the 1 day at 10 in the morning.
First Quarter, the 8 day, 15 minutes past 8 at night.
Full Moon, the 16 day, 57 minutes past 8 at night.
Last Quarter, the 24 day, 48 minutes past 2 morning.
New Moon, the 30 day, 39 minutes past 9 at night.

The { 5 day at 5 morning, *Jupiter* / 5 day at 8 beforenoon, *Mars* / 8 day at 2 afternoon, *Saturn* / 9 day at 10 at night, *Venus* } is with the Moon.

Saturn, *Jupiter*, *Mars*, and *Mercury*, are *Occidental* and *Evening Star*, all this month. *Venus* continues *Oriental*, and a *Morning Star* still.

Saturn was *Stationary* at the *latter end* of *October*, and now He becomes *direct* in *motion* in the 7th *degree* of *Pisces*. *Jupiter* and *Mars* remove now out of *Capricorn* into *Aquarius*. This *month* begins with a friendly Aspect, *viz.* a *Sextile* of *Mars* and *Mercury*, in *Scorpio* and *Capricorn*. And there is four more of the like *Aspects* now, *viz.* of the *Sun* and *Jupiter*, in *Scorpio* and *Capricorn*; of *Venus* and *Mercury*, in *Libra* and *Sagittary*; of the *Sun* and *Mars*, in *Sagittary* and *Aquarius*, and of *Saturn* and *Mercury*, in *Capricorn* and *Pisces*. There is also now a *Quartile Aspect* of *Saturn* and *Mercury*, and of the *Sun* and *Saturn*, in *Sagittary* and *Pisces*, and of *Jupiter* and *Venus*, in *Scorpio* and *Aquarius*. These *Configurations* seem not to portend any Matters of extraordinary Consequence, as unto *Mundane* Concerns— But the *Effects* of the late *Conjunction* of *Jupiter* and *Mars*, seem design'd to operate ere long in some Parts of the World, under *Capricorn* (the *Sign* wherein the *Conjunction* happened) and *Cancer* its opposite *Sign*: And there may appear some Controversies, or Debates, in some Places about Religious Matters; if not some Military Doings upon the Account of Religion, to the Trouble of some People in *Europe* —

Moderate weather for the *time* of the *Year*; yet sometimes very *cold*, *stormy*, *frosty*, or *snowy weather*, will happen in this *month*.

December

First Quarter, the 7 day, 47 minutes past 11 before noon
Full Moon, the 15 day, 9 minutes past 1 morning
Last Quarter, the 21 day, about 9 at night
New Moon, the 29 day, about 6 in the morning

1 day at 8 morning, *Mercury*
2 day at midnight, *Jupiter*
4 day at 3 afternoon, *Mars*
5 day at midnight, *Saturn* } is with the Moon.
6 day at 6 at night, *Venus*
27 day at midnight, *Mercury*
30 day at 8 at night, *Jupiter*

Saturn, *Jupiter*, and *Mars*, continue still *Occidental* and *Morning Stars*, and *Venus Oriental*, and a *Morning Star*: *Mercury* is *Occidental*, and an *Evening Star* to the 21st day, then he becomes *Oriental* and a *Morning Star*.

About the *middle* of this *month*, *Mars* leaves *Aquarius*, and comes into *Pisces*, and forthwith proceeds towards *Saturn*, and will be with *Him* in *Conjunction*, on the 19th of this *month* in the 10th *degree* of *Pisces*; which *Conjunction* may have some very important Effects, which will be manifested in the *next Year* 1701. The *Sun* now enters the *Solstitial Sign Capricorn*, and the *Winter Quarter* *Astronomically* begin; the *Heavenly Bodies* being then moderately Aspected. There is now a *Trine Aspect* of *Saturn* and *Venus*, in *Scorpio* and *Pisces*; a *Sextile* of *Venus* and *Mercury*, in *Scorpio* and *Capricorn*, of the *Sun* and *Saturn* and *Mercury*, and *Mars* and *Mercury*, in *Capricorn* and *Pisces*; and of *Jupiter* and *Venus*, in *Sagittary* and *Aquarius*; a *Conjunction* of the *Sun* and *Mercury* in *Capricorn*, and a *Quartile* of *Jupiter* and *Venus*, in *Sagittary* and *Pisces*. Those Places and People that are under *Pisces*, (the Sign wherein the now *Conjunction* of *Saturn* and *Mars* is, and *Virgo* its opposite *Sign*) may be much concerned in the Effects in the *next Year*. It seems to have some eminent Significations—

Seasonable weather in this *month*—sometimes *cold* and *frosty*; and there may be some *Snow* also, &c.—

Astronomical Observations and Predictions, for the Year, 1700.

By Christian Longomontanus, Student in Astronomy.

Year of which I now write, from the Creation of the World, according to the best reputed Chronology, is [illegible]. From the Birth of our Blessed Saviour Jesus Christ, [illegible]. From the Julian Period, [illegible]. Of the Jews, [illegible]. And lastly, Rabbinical account, [illegible]. It is the 4th Year of the 616 Olympiad. The Cycle of the Sun is [illegible]. The Golden Number is [illegible]. The Year is full Moony, or Lunar, according to the old Roman account, having 12 Dominical Letters thereto, A and B. From the beginning of the Year, to the 25th day of February, then A, all the whole Year after. But according to the New Gregorian account, it is a Common Year, and not a Bissextile, and has but one Dominical Letter thereto, and that is C. The Cause and Reason thereof here follows, [illegible]

Julius Cæsar, about 45 Years before the Incarnation of our Blessed Saviour Jesus Christ, perceiving the Lunar Year to contain only 354 Days 9 Hours, the Advice of Sosigenes the Egyptian Mathematician, whom he brought with him from Alexandria, added 11 Days and 6 Hours thereto, reducing the Year to the Solar Course, making it to consist of 365 Days and 6 Hours, which 6 Hours every 4th Year amounts to a Day, or Leap year, of 366 days; whereas the other 3 Intermediate Years contain only 365, and this is that which is called the Julian Year, as being introduced by the said Julius Cæsar; it still remained, and generally used by the Syrians, Ægyptians, Æthiopians, and Abyssines, and by us also here in England; and was generally in use by every Nation, until the Year 1582, when should Julian Year, being found to be swelled, and found to be very erroneous, to regard it exceeded the Tropical, or Solar Year (suppose full eleven

...(of which I do here write) to be a Year of very great Impor-...

[illegible] Astrologers, [illegible] Astrologie: [illegible] Opinion [illegible] Design to amuse the World thereby, [illegible] heretofore have been much Inclined to [illegible] first Empire of this World was of the Assy- [illegible] or began in the Eastern parts thereof, [illegible] Persians and Greeks to the South, and that of the [illegible] to the Westward; so the Northern parts of the [illegible] should about this very Year 1700, (or in the Year- [illegible] Account now begun) produce, or bring forth [illegible] should Erect or Advance unto himself an Im- [illegible] Dominion, or Principality of as great Magnificence [illegible] as the former here mentioned, if not far exceed- [illegible] of them, of whose Might and Greatness, that famous [illegible] for in California, Anno 1572. (So diligently observed [illegible] the Noble Tycho Brahe) was (as they conceived) the [illegible] or forerunner, and they thought moreover, that [illegible] this Prophecy of Sibil Tiburtina, (mentioned by the said [illegible] Brahe in his Treatise of the said New Star) intended [illegible] Operation to the same purpose, viz. A Star shall arise in Ex- [illegible] towards the great House of the North, whose Beams shall [illegible] duly enlighten the whole World, &c. See the Ladies [illegible] Angelus Ephemeris for the Year, 1656. Alfridus in [illegible] Thesaurus Chronologiæ, pag. 483, (Mihi) writes thus, Phi- [illegible] veram Astronomicarum restituere cupiens, quatuor Mo- [illegible] non secundam præeminuit Regnorum sic Scripturæ [illegible] Quatuor Cardines Mundi. Prima in Orientali, Assyriam; [illegible] Secunda Meridionalis, Persarum & Græcorum: Tertia Occiden- [illegible] Romanorum: Quarta Septentrionalis, sive Boreas, quam, [illegible] Deus conflaturus in septentrione per Leonem septentrionalem, Mag- [illegible] de cujus Adventu illorum, qui Regnum Antichristi & [illegible] Abominationem illorum, quem hic ex certo Dei mysterium, mihi [illegible] Thus he.

[illegible] do not further proceed, and say, That the Lord Na- [illegible] Stanton Southman, has also somewhat hinted at this [illegible] present Year 1700, in the 14th Proposition of his Book, Intit- [illegible] uled, A plain Discovery of the Revelation of St. John. Besides [illegible] Several others, who have applied themselves to discover the [illegible] Mysteries contained in that Book, and Number 666, men- [illegible] tioned in the last Verse of the 13th Chapter thereof. Have [illegible] been full of Expectations about the Events of this [illegible] Year:

Years. Because this is accounted not to be the true Year, there-
fore Annals of Years, for [illegible]
particular, he (as they say) was to be born [illegible]
from the Birth of our Lord, but from [illegible]
and Miracles, by which he accomplished the [illegible]
of our Redemption. So that whatever the Year of our Lord
there mentioned, signifies unto the World, how correct or
or be manifested (according to their Conjectures) even [illegible]
this very Year 1700. The truth is, *Chronologers* do not fully
agree about the Year of our *Savior's Passion*. *Petavius*, in
his Rationarium of *Chronology*, makes it to be the [illegible]
from his Birth, and so doth Mr. *Hackspan* in his [illegible]
Encyclopædia: But *Dionysius Petavius*, accounted by some an
intelligent Writer of Times, in the *VIIth Chapter* of his
9th Book of the *History of the World*, saith, that our *Blessed*
Saviour had fully finished the 34th Year of his Age, when he
suffered upon the Cross; and this is by many accounted to
be the truest account thereof.

And now, forasmuch also, as some Persons have conjectured, that the end of the World, or general Judgment draws near; I here therefore say, in the Words of a very learned Divine, *viz.* "To define the particular Time when this shall "be accomplished, is beyond the Knowledge of the Angels "of highest Dignity. 'Tis *inter arcana Imperii*, amongst the "Secrets of the Kingdom of Heaven. 'Tis observable, that God "has revealed the time precisely wherein some great Events "should come to pass, *viz.* after how many Years the *Jews* "(*Israelites*) should be freed from *Egyptian* Bondage: after what "space of time they should be restored from the Captivity "of *Babylon*: when the *Messiah* should die for the expiation "of Sin. But there is no designation by certain Characters "of the particular Day, nor Year, nor Age, in any Prophecy of our *Saviour's* coming to Judgment. Thus Dr. *Hales*, *Chap.* 18. of *Eternal Judgment*. "That it shall come is certain (*saith another Learned Man*) "When it shall come is "uncertain, and it every Day draws nearer and nearer, "therefore it is not Wisdom to remove the Evil Day far "from us, but to prepare our selves for it by a Holy Conversation, that we may get above the Terrour and Dread "which will otherwise attend the apprehension of the approach of it, and that we may be provided against the

"Work

The Sun ingresses into Capricorn *in* December, 1699.

Upon *Sunday* the 11th Day of *December* 1699. at 55 Minutes past 11 of the Clock in the *Morning*, the first moment of his entrance into *Capricorn*, or (according to the Copernican Hypothesis) the Earth into *Cancer*: the then *position* of Heaven is as followeth.

At this Instant of the Sun into *Capricorn*, the 27 Degree of *Pisces* ascends in our Horizon, and the 29th degree of

UMI

and continued thereon, to the 8th day of May 1672,

Ingress of the Sun, the Planets

disposed, and are not concerned

Mercury amongst themselves,

in the Heavens of January and

Quarter, (as we call it) of the Air,

of this World will be mutable, and

or for the most part: tho' there may be

Reports then, concerning some Martial matter,

in some Countries, and it may be feared, that there

happen in the aforesaid Months, some decay of the

sort of Cattle, as Cows, Horses, Oxen, &c. to the

of some people in some places, and many Rob-

may be committed, &c. As to the Weather in the

aforesaid Months, viz. January, and February, will

remarkable: It may be sometimes very cold,

much inclining to Snow, now and then, if not very much.

Quarter, viz. on Friday the 23d of February, about

past 7 of the Clock in the Morning, there will be

very great Eclipse of the Moon, about the 15th degree of

Virgo. The Type, and particular account thereof, you have

in my Observations on that Month, unto which I refer you.

At the middle time of this Eclipse, the Heavens will be thus

placed, viz. Saturn will be in the 5th degree of Pisces in

the 12th House, and the Sun, and Caudæ Draconis also, the

one in the 13th degree of Pisces and the other full by it.

Mercury will be in that House too, in the 26th degree of

Aquarius; Jupiter will be in the 11th House, in the 24th de-

gree of Capricorn, Mars in the 21 degree of Scorpio in the

7th House, Venus in the Ascendant, in the 11th degree of

and the Eclipsed Moon in or near unto the 5th degree

of Virgo aforesaid, in the 6th House, near upon

This Eclipse begins in the 5th House, the middle in the 6th

of Virgo as aforesaid, in the 6th House, near upon

Aquarius; The beginning and fore part thereof will be

from us (if the Air proves clear) the middle and latter

part thereof will not be seen here in England, because the

Moon will then be gone from our Horizon.

This Eclipse of the Moon is in Virgo, a Sign of the Earthy

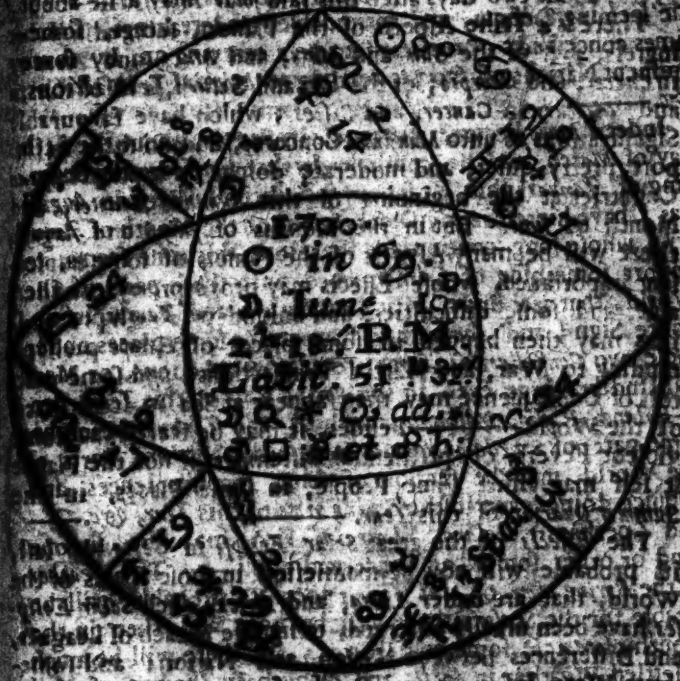
Triplicity; Procter (an Excellent Mathematician of his time)

At this *Ingress* of the *Sun* into *Aries*, the 24th degree of *Cancer* ascends in the *Horizon*, and the 20th degree of *Pisces* is upon the *Cusp* of the *Medium Cœli*. *Saturn* is in the 9th degree of *Pisces*, in the 5th House of Heaven (about 4 degrees from *Cauda draconis*) and *Mercury* is there too, in the 22 degree of *Pisces*. *Jupiter* is in the 20th degree of *Capricorn* in the 4th House, *Mars* in the 5th House, the 24th degree of *Scorpio* his own House. The *Sun* is in the 12th House, and (o-n *Venus*, who is just ending her *Course* before the *Sun*. The *Moon* is also in the 12th House, in or about the 24th degree of *Pisces*, and *Caput draconis* is in the 24th degree of *Virgo*, in the 3d House. The *Moon* is separating from a *Square* of *Jupiter*, and is void of Course, but presently enters into the *Conjunction* of the *Sun* in *Aries*.

Thus are the Planets situated at the Ingress of the Sun into *Aries* this *Year*, being all above the Earth but *Mars*.

This verral Aspect as attended with some serene and amicable Influences, the Sign Leo, was Home of Mars and Mercury in Scorpio, and Libra, a Seat of Jupiter and Mercury in Capricorn and Pisces, and Venus belonging to a Society of Saturn and Sol; Mercury, Governing the Day, which [illegible] Constellation, as in Capricorn. This [illegible] Aspects, and the Ethereal Rules, [illegible] Affairs and Proceedings [illegible] Year in many [illegible] there may be some Rumours about Armies; Negotiations of some Peace, and some Fears, and Jealousies may arise about the seeming Designs, and formidable Undertakings, [illegible] times conceived, or supposed to be carrying on by some eminent Nations of Europe, tending to Martial Transactions, &c.

Indeed Mars becomes Retrograde in Scorpio, about the 24th day of March, and he continues in that Retrogradation [illegible] ning of January this Year, to the second Week in August (as I have hinted in my Observations on the Month of January) whose long continuance therein at this time seems, to import something of Consequence unto those parts of the World, that are under that Constellation, and Taurus being opposite Sign; and these may happen in some places under those two Constellations, some troublesome Actions, or Martial Undertakings even in the Spring time of this Year, &c. —England, Ireland, Holland, much of the Turkish Dominions, some part of Sweedland, and some other Northern Parts of the World, may be sensible of some Inconveniences, and disquiet doings even in the Spring time of this Year, &c. —— (perhaps) Poland, Tartary, &c. may be in some kind or other somewhat concerned also. —— The Weather in the Spring time of this Year 1720. is probable, and the Seasons for the Sowing thereof will be very fair; and then in the Month of March, [illegible] and there will be much unsettled Weather in April, and many lusty showers of Hail and Rain, with great claps of Thunder, [illegible] and [illegible] also [illegible] and [illegible] [illegible] and [illegible] [illegible] [illegible]



degrees of Pisces (Anno 1700. Retrogradient) ☽ in the
the 3d. House, in the 20th Degree of Capricorn, Retrograde
being just come back from Aquarius (Anno 1700.) Mars being

Ascendant,

Position of Heaven, at the Sun entring into Libra,

1700.

THE Sun comes into *Libra*, (or the *Earth* into *Aries*)
upon *Thursday* the 14th of *September* this Year, at
three quarters past 1 of the Clock in the Morning, and the
Earth doth then *Aftronomically* begin to shew the
Heavenly Bodies will be poised in the
